

MILLWRIGHT

Installing and working with **process equipment** is an everyday part of life at Robinson Construction. The challenges we face are often **complex**, but we have the **experienced** team of engineers and field supervisors needed to successfully complete complex equipment installations.

Through years of experience, our field supervisors and workforce have developed effective techniques and methods to economically and safely complete equipment installations while maintaining the productivity and quality that you expect.

Services We Provide

- Packaging and Shipping - We are experienced at packaging equipment for shipment. We can also transport the equipment to the new location ourselves, if that is requested.
- Rigging, Lifting, and Moving - We have the knowledge required and equipment necessary to unload and move equipment into the most challenging locations.
- Placing and Startup - Our team can level, grout, and align complex equipment economically.
- Piping and Hookup - Piping is our specialty. We are familiar with nearly every type and size of pipe.
- Ductwork - Process ventilation and HVAC ductwork is completed in accordance with SMACNA standards.
- Pipe Fabrication - Piping design is prepared using CAD and prefabrication is completed in our certified pipe fabrication facility.

Available Equipment

- Forklifts, personnel lifts, welding equipment, rollers, and all equipment needed for installation.
- Mobile cranes and riggers for equipment unloading.

"Excellent record for performance, meeting project deadlines, and maintaining safety record"

BioKyowa, Inc. - Cape Girardeau, Missouri

"The Robinson Construction team worked together with our maintenance team to safely & effectively complete this project. We appreciated their good attitudes & willingness to work with our department throughout this project."

Sun Chemical Corporation - Hopkinsville, Kentucky
